Re: Expanded accreditation

We are pleased to announce that Proficiency Testing Canada's scope of accreditation has been increased to include the following new test groups:

- C70 Potency in Cannabis;
- C71 Pesticides in Cannabis;
- C72 Metals in Hemp;
- C73 Residual Solvents in Hemp Oil; and,
- C78 Moisture in Hemp.

In addition to this, eight analytes have been added to the scope for C02C Total Metals in Water:

- Antimony;
- Arsenic;
- Beryllium;
- Cadmium;
- Selenium;
- Silver;
- Tin; and,
- Uranium.

Two Analytes have been also added to the scope for C44 Nutrients in Soil:

- Organic Carbon; and,
- Phosphorus.

To see the complete scope please follow this [link](#).

Sincerely,

Ken Middlebrook | Executive Director
